Projects

Open Source Integrated Design Suite(OSIDS)

Jan 2023 - May 2023

- Led a group project that seeks to align user experience across open-source design tools (Scribus, Inkscape, and Gimp) while ensuring fulfillment of all client requirements.
- Successfully resolved the challenge through extensive research, meticulous design, seamless integration efforts, prototyping, and rigorous user testing.
- This project resulted in new, aesthetically pleasing interfaces characterized by consistent color schemes, button designs, layouts, fonts, and other visual elements that guarantee a better user experience.

Personal Website

Jan 2023 - present

- Designed and developed an easily accessible website showcasing personal projects using HTML, CSS, and JavaScript.
- This project provided valuable insights into the importance of responsive design, file formats, spacing, layouts, design hierarchies, and accessibility. Additionally, it involved the practical experience of hosting the website on a server and maintaining it.
- The result of this project is an operational website that adheres to accessibility guidelines and serves as a platform for showcasing a diverse range of my projects.

Various Personal UI/UX Projects

Jan 2023 - present

- Constantly developing a deeper familiarity with different design tools like Figma, Lucid, Blender, Adobe Suite, and other mainstream software.
- Different projects meant different challenges which required extensive research and practice in areas such as color theory, prototyping, programming, compositing, video editing, and more.
- Achieved proficiency in each tool, facilitating seamless navigation and effective problem-solving across projects.
